Page Count: 240 pages

Pub: *Author House*

Also available in Hardcover and E-book formats.

Death by Wall Street: Rampage of the Bulls, a murder mystery, is based on real events. It is the story of how the oligarchs of Wall Street, doctors and others in the pharmaceutical research profession having significant conflicts of interest, and employees of two 'captured' US government agencies—the Securities and Exchange Commission (SEC) and the Food and Drug Administration (FDA)—by design as well as by simply refusing to pursue the evidence of malfeasance provided to them, deny patients life saving treatments that are demonstrated safe and effective in FDA-approved drug trials.

When the severed head of a Wall Street stock analyst turns up spiked on a horn of the Wall Street Bull, Detective Louis Martelli of the NYPD is assigned to track down the murderer. But why were this victim and the victims of two similar murders that followed singled out for execution? Martelli eventually learns the answer to this question and tracks down the killer, but not before uncovering some of Wall Street's and the US government's darkest secrets pertaining to the US financial markets and the nation's health care practices.

Theodore J. Cohen, Ph.D., holds three degrees in the physical sciences from the University of Wisconsin–Madison and has been an engineer and scientist for more than 40 years. From December 1961 through early March 1962, he participated in the XVI Chilean Expedition to the Antarctic. His communications lifeline to the world was ham radio. At the time of the Expedition, his U.S. call sign was W9VZL; today, it is N4XX.

The U.S. Board of Geographic Names in October, 1964, named the geographical feature Cohen Islands, located in the Cape Legoupil area, Antarctica, in his honor.

Dr. Cohen has published more than 350 papers, articles, columns, essays, and interviews, and is a coauthor of The NEW Shortwave Propagation Handbook (from CQ Communications).
